Notes

*Course Adjustment derived from how same runners (all teams, not just PSHS) performed in previous meet and so tries to estimate time change due to the course difficulty.

*Course Adjustment derived from how same runners (all teams, not just PSHS) performed in previous meet and so tries to estimate time change due to the course difficulty.

Note that the typical runner is likely improving as season progresses, so the same adjusted time run later in season is likely an improvement, just same amount as everyone else.

The Plano Invitational serves as the baseline; adjustment 1.0. For that race I have previous years time for comparison.
